PROJECTS

Netflix Clone | *Javascript, Html, CSS, Git, VS Code*
- Checkout **live project here** and Checkout code on **Github**

WeatherApp | *API Based Project on Javascript*
- Checkout **live project here** and Checkout code on **Github**

BloggingApp | *React Js Project*
- Checkout **live project here** and Checkout code on **Github**

EXPERIENCE

Ascent Buissness Solutions | *Front-End Devloper* April-2024 – September-2024
Project:HR Information System

- Developed an intuitive and responsive user interface using HTML, CSS, and React.js, ensuring a seamless user experience across devices.
- Implemented dynamic search functionality, allowing users to input custom queries to efficiently find employee records and relevant HR information.
- Integrated APIs (or backend services) using JavaScript to retrieve and manage current employee data, including profiles and associated documentation.

Techquadra Software Solutions | *React JS Intern* October- 2023 – March-2024
Project: Student Management Website for School

- Designed and implemented a user-friendly UI for the Attendance module in a School Management System using React.js, allowing teachers to efficiently mark student attendance.
- Developed intuitive menus for exam and assessment creation, utilizing React.js and JavaScript to enhance the Exam module's functionality.
- Integrated exam-related data seamlessly into the system's API, optimizing data management and retrieval processes.
